PROJECTS

BOOKWORM

Dec. 2019

Allows user to set reading goals and track their progress. Users can search for books by title and/or author name and even save titles that they want to read. The app tracks every book the user has marked as read even when they reach and reset their goal.

Technology used: React, Redux, Local Storage, Google Books API

LET'S COOK

Nov. 2019

Users can search for recipes based on any ingredient they have in their kitchens or find inspiration with the quick search options. With food allergies being a common concern when meal planning, all food allergens are clearly labeled before the user even clicks to open a recipe fully, saving them time and energy.

Technology used: React, JavaScript, Edamam API

DICTIONARY & THESAURUS

Oct. 2019

My first JavaScript project consumed the Words API to create a combined dictionary and thesaurus.

Technology used: JavaScript
